Amendments to Claims

1. (Previously Presented) A composition, comprising, about 5 to about 25 percent by weight of a particulate aramid, about 5 to about 40 percent by weight of a particulate perfluorinated polymer, 0 to about 15 percent by weight of hollow glass or quartz spheres, and the remainder a continuous phase of a liquid crystalline polymer, wherein percent by weight is based on the total amount of said particulate aramid, perfluorinated thermoplastic, hollow glass or quartz spheres, and liquid crystalline polymer present.

2. (original) The composition of claim 1 wherein said particulate aramid is an aramid powder.

3. (original) The composition of claim 1 wherein about 10 to about 30 weight percent of said perfluorinated polymer is present.

4. (original) The composition of claim 1 wherein said perfluorinated polymer is a homo- or copolymer of tetrafluoroethylene.

5. (original) The composition of claim 1 wherein 0 to about 10 weight percent of said hollow glass or quartz spheres are present.

6. (original) The composition of claim 1 wherein about 8 to about 22 percent by weight of said particulate aramid is present.

7. (original) The composition of claim 2 wherein said particulate aramid is poly(p-phenylene terephthalamide).

8. (original) The composition of claim 1 wherein about 10 to about 30 weight percent of said perfluorinated polymer is present, wherein 0 to about 10 weight percent of said hollow glass or quartz spheres are present, and about 8 to about 22 percent by weight of said particulate aramid is present.

9. (Currently Amended) The composition of claim ~~2~~ 8 wherein said particulate aramid is poly(p-phenylene terephthalamide).

10. (original) An electrical or electronic part comprising the composition of claim 1.

11. (original) An electrical connector comprising the composition of claim 1.

12. (original) An electrical or electronic part comprising the composition of claim 8.

13. (original) An electrical connector comprising the composition of claim 8.

14. (original) An electrical or electronic part comprising the composition of claim 2.

15. (original) An electrical or electronic part comprising the composition of claim 9.
